

REC-FLEX SPORTS FLOORING

BY:

REC-TURF INC
SPECIALISTS IN SPORT SURFACES

REC-FLEX SEAMLESS MULTIPURPOSE SPORTS FLOORING

Rec-Flex is an ideal sports surface for multipurpose sports floors. From gymnasiums through to fieldhouse sports floors, Rec-Flex is a great way to maximize the potential of your facility by providing a highly versatile, durable, and easy-to-maintain sports surface.

What is Rec-Flex?

Rec-Flex is a seamless, polyurethane sport surface poured over top of a resilient shock pad for comfort and safety and is available in a number of different sizes tailored to the specific needs of your facility. While the polyurethane topcoat provides a seamless, versatile sports surface suitable for any range of traditional sports and gymnasium activities, the resilient shock pad underlayer provides added safety, comfort and injury prevention for the users of the floor.

MULTIPURPOSE SPORTS FLOORING

Rec-Flex is **VERSATILE, MULTIPURPOSE, SPORTS FLOORING** for all types of activities.

Endless Design Options

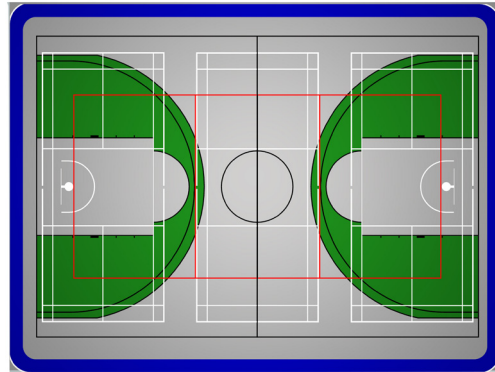

Rec-Flex is available in a number of different colour options allowing for any number of creative design options to help you to optimize space in your facility as well as provide it with a great look.

Different games line colours can be used to highlight different activities. In addition to using different lining colours, you could also help to mark the playing spaces by using different colours for specific courts. Rec-Flex has a number of different colour options so you can choose from any number of layouts or court designs for your facility.

Customize your floor with a variety of Line & Logo Painting Options

You can mix and match all of Rec-Flex's colours, including games lines colours to match your school or organization's signature colours. In addition, custom logos and designs can easily be incorporated to give your facility a truly unique look.

Rec-Flex is the PERFECT Fieldhouse Flooring Solution

Rec-Flex can be installed using an in situ (paved in place) Poly-Shock Pad base which can be installed directly onto a number of different sub-base materials and does not require a concrete or asphalt base. This feature makes Rec-Flex an ideal fieldhouse surfacing solution by **REDUCING BUILDING COSTS.**
