

REC-TURF

PORTABLE TURF SYSTEM

Features and Benefits

Description – The **REC-TURF Portable Turf System** is a versatile sports surface manufactured with polypropylene and nylon fibers sewn into a reinforcing scrim layer.

REC-TURF's bio-designed system achieves additional shock absorption by adding the resilient **REC-PAD** underlay. These two separate components are much lighter and easier to transport.

Seams – The removable Velcro seaming tape is color matched with the turf and available in 4" wide material. The Velcro encapsulates the seam and allows for an efficient conversion time.

Game Lines – The Velcro game lines are easily fastened to the turf and available in a wide range of colors. They can quickly be reconfigured for a change of game or activity.

Movable – **REC-TURF** is manufactured to a maximum dimension of 4 m, (13.1 ft) x 75 m, (246 ft). Packaged rolls are 1 m, (3.28 ft) in diameter and weigh approximately 544 kg, (1,200 lbs). A full size **REC-PAD** roll weighs approximately 450 kg, (990 lbs). The lightweight construction of our durable product allows for versatility and ease of handling by the owner.

Warranty – **REC-TURF** has a three-year warranty against defect.

Specifications

REC-TURF

➤ Pile Content:	50% Nylon / 50% Polypropylene
➤ Fiber Weight:	1,352.5 g/m ² (0.277 lb/ft ²)
➤ Total Weight:	1,830 g/m ² (0.375 lb/ft ²)
➤ Pile Height:	9 mm (0.35 inch)
➤ Total Thickness:	15 mm (0.59 inch)
➤ Standard Width:	4 m (13.1 ft)
➤ Maximum Roll Length:	75 m (246 ft)

REC-PAD

➤ Pile Content:	100% Polypropylene Blend
➤ Total Weight:	1,500 g/m ² (0.307 lb/ft ²)
➤ Total Thickness:	10 mm (0.39 inch)
➤ Loss of Thickness on Compression:	10% after 3 years at 10 t/m ² (2,048 lb/ft ²)
➤ Permeability:	2,000 L/m ² (40.87 Imp. gal/ft ²)
➤ Standard Width:	4 m (13.1 ft) On site trimming required
➤ Roll Length:	To Order
